

ANNA J. STERLING

QUALIFICATIONS

I pride myself on being a "translator" between the server room and the boardroom. While I have the technical depth to understand complex architecture, my real strength lies in my ability to listen to a client's pain points and articulate a solution that makes sense for their bottom line. I focus on building long-term partnerships rather than just closing transactions.

EXPERIENCE

Senior Technical Sales Manager | Global Cloud Systems | Jan 2020
– Present

Responsibilities: Lead the strategic sales direction for the DACH region, focusing on hybrid cloud migrations and enterprise AI integration. I oversee the entire sales lifecycle from initial technical discovery to final contract negotiation, ensuring all solutions are technically viable and scalable.

Impact: Managed a team of 15 senior solution architects and pre-sales engineers. Responsible for a portfolio of 30+ enterprise-level projects annually with a total contract value exceeding €25M.

IT Solutions Lead | TechMatrix Solutions | June 2015 – Dec 2019

Responsibilities: Developed technical proof-of-concepts for cybersecurity frameworks. I worked closely with the engineering team to customize software features based on feedback from our top-tier enterprise clients.

Impact: Coordinated 5 cross-functional teams across EMEA and successfully increased the client retention rate by 15% through improved post-sales technical support.

EDUCATION

M.Sc. in Information Technology | May 2015 | University of Technology Berlin

Summary: Graduated with honors (GPA 1.2). Focused on Enterprise Architecture and Strategic Management. Certified Azure Solutions Architect Expert and Professional Sales Management (PSM).

B.Sc. in Computer Science | July 2012 | Technical College Munich

Summary: Focused on Software Engineering and Network Security. Awarded "Best Final Project" for an automated network diagnostic tool.

OBJECTIVE

Dynamic IT Sales Leader with over 10 years of experience driving revenue through complex cloud and infrastructure solutions. I specialize in aligning cutting-edge technology with enterprise business goals to deliver high-impact digital transformations.

VOLUNTEERING & LEADERSHIP

Project Lead | TechForYouth NGO

I led a volunteer team of 10 developers to build a digital learning platform for underprivileged schools. I was responsible for project timelines, resource allocation, and stakeholder reporting.

Mentor | Regional Coding Club

Served as a guest lecturer and mentor for students interested in the intersection of business and technology, helping them navigate early career choices in the IT sector.
